LG India Homepage Clone

A pixel-perfect, production-ready frontend clone of the LG India homepage built with React.js and Tailwind CSS.

🚀 Quick Start

Prerequisites

- Node.js 16+
- npm or yarn

Installation

```bash
# 1. Navigate to the project directory
cd lg-india

# 2. Install dependencies
npm install

# 3. Start the development server
npm start
```

Open http://localhost:3000 to view it in the browser.

Build for Production

```bash
npm run build
```

📁 Project Structure

```
lg-india/
├── public/
|   └── index.html
├── src/
|   ├── components/
|   |   ├── Navbar.jsx          # Sticky navbar + mega menu + search
|   |   ├── HeroSlider.jsx      # Auto-sliding hero banner carousel
|   |   ├── CategorySection.jsx # Horizontally scrollable category cards
|   |   ├── ProductCard.jsx     # Product card + skeleton loader
```

```

```

✨ Features

Layout Sections

- ✅ **Top navigation bar** — logo, nav items, search, wishlist, cart, account icons
- ✅ **Mega menu dropdown** — hover-triggered with featured product + sections
- ✅ **Hero banner carousel** — auto-sliding with progress bar, arrows, dots
- ✅ **Category section** — horizontally scrollable category cards with icons
- ✅ **Featured products slider** — cards with image, rating, price, add to cart
- ✅ **Promotional banners** — gradient promo cards + large feature banner
- ✅ **Best sellers slider** — ranked products with badges
- ✅ **New arrivals slider** — latest product launches
- ✅ **Brand story section** — values, video hero, ThinQ app, sustainability
- ✅ **Newsletter section** — email subscription with topic preferences
- ✅ **Footer** — multi-column links, social icons, app store badges

UI/UX

- ✅ **Fully responsive** — mobile, tablet, desktop breakpoints
- ✅ **Dark mode toggle** — persistent via localStorage
- ✅ **Loading skeletons** — shimmer effect on product cards
- ✅ **Scroll animations** — reveal on scroll for each section
- ✅ **Sticky navbar** — with shadow on scroll
- ✅ **Back to top button** — appears after scrolling 500px

- ✅ **Hover effects** — scale, underline, color transitions throughout
- ✅ **Mobile accordion footer** — collapsible link groups on mobile
- ✅ **Search bar** — expandable with quick tag suggestions
- ✅ **Wishlist toggle** — per-product heart button
- ✅ **Add to cart feedback** — button state change confirmation

---

🎨 Design System

Token	Value
Primary Red	`#A50034`
Dark Red	`#8B002C`
Dark BG	`#1A1A1A`
Gray BG	`#F5F5F5`
Font	Noto Sans (Google Fonts)

🔧 Tech Stack

Technology	Purpose
React 18	UI framework (functional components + hooks)
Tailwind CSS	Utility-first styling
Lucide React	Icon library
IntersectionObserver API	Scroll-based reveal animations
CSS Animations	Shimmer, slide, fade effects

📝 Notes

- All product images use Unsplash placeholder images (no copyrighted LG assets)
- No backend required — all data is static mock JSON
- Dark mode preference is persisted in `localStorage`

- Product loading uses a simulated 1.8s delay to showcase skeleton UI
